DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on July 8, 2004 is being considered by the examiner.

Election/Restrictions

2. Applicant's election of Species III in the reply filed on December 12, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 33-42 are cancelled.

4. The following is an examiner's statement of reasons for allowance:
5. The main reason for allowance of the instant application over the prior art is that the prior art fails to teach or suggest a projection exposure system utilizing light of wavelength less than or equal to 193 nanometer, i.e. extreme ultraviolet or soft x-rays, where a collector for said light comprises first and second mirror shells nested one within the other, and further including a fastening device for fastening the first mirror

Art Unit: 2881

shell to the second. The fastening device as claimed further includes a support spoke which, when projected into an illumination plane, yields a projection which is non-parallel to a scanning direction. The examiner has interpreted this last limitation regarding a "non-parallel" projection to mean that the projection of the support spoke has no component projected into the illumination plane and is therefore perpendicular to said illumination plane.

6. The above limitations are recited in claim 22. Remaining claims 23-32 are dependent on claim 22 and are therefore allowable by virtue of their dependency.

7. In examination of the instant application, consideration was given to a commonly assigned case, US Patent Application Publication Number 2004/0065817 A1 to Singer et al., assigned to Carl Zeiss SMT AG.

8. The claimed subject matter of this application was considered for a Double Patenting type rejection, but the required limitations concerning the support spoke and fastening device in the instant application recite a different material element than that of the "component in a region between said first and second mirror shells." Said component could not apparently be construed to satisfy the required fastening and support spoke means because the fastening and support spoke means of the instantly claimed invention are not apparently interposed between the mirror shells.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
